

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

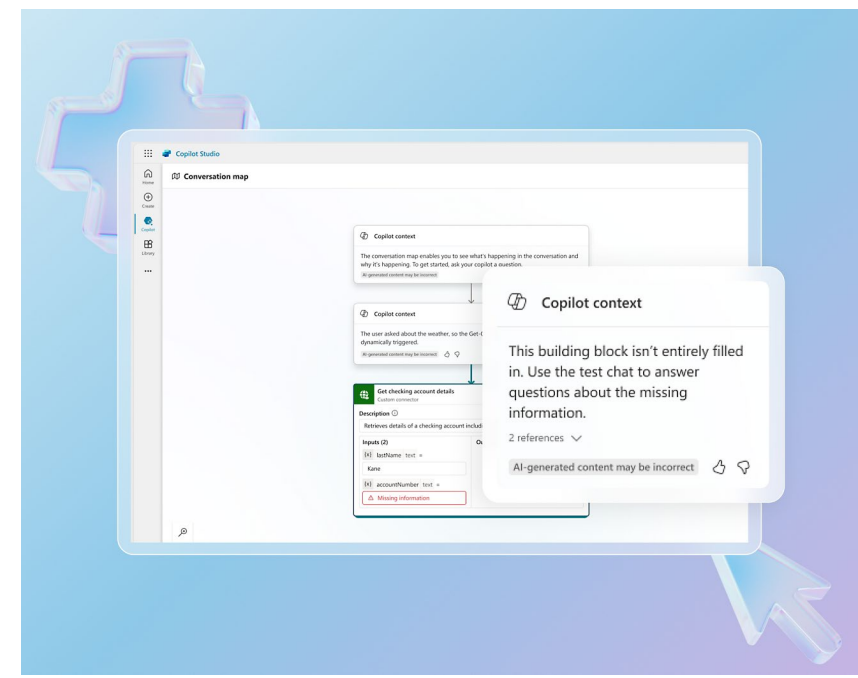

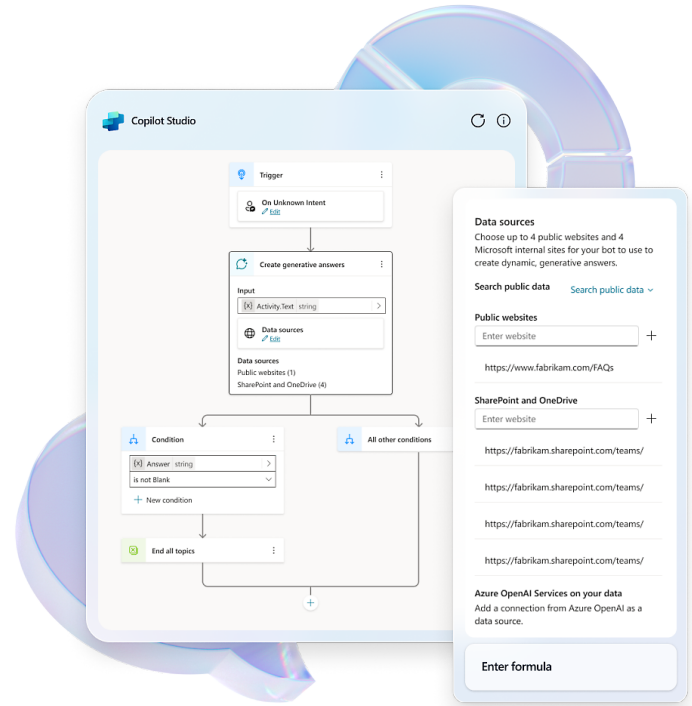

Copilot Studio

Your copilot, your way

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

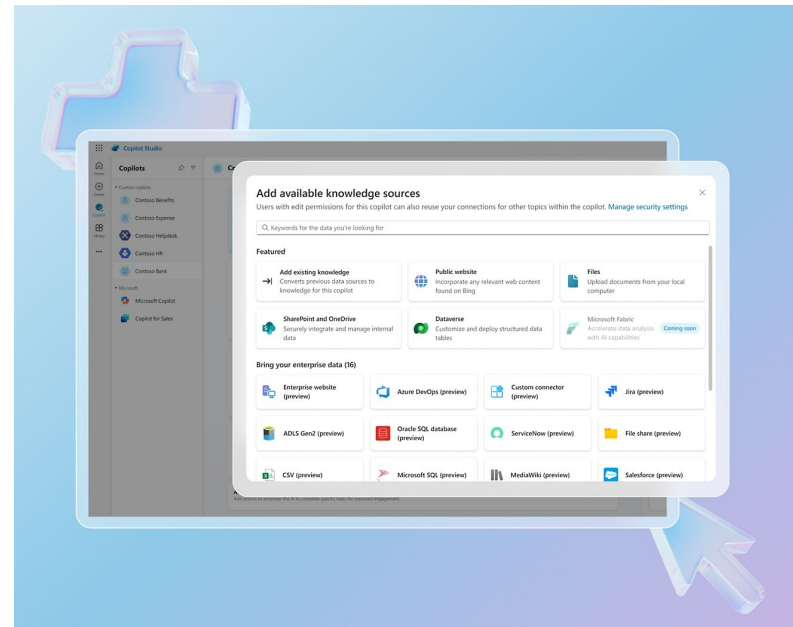

Copilot Studio offers a graphical, drag & drop development environment to build your own Copilot.

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

With Copilot Studio, **you can make copilot that:**

- Easily create and customize copilots tailored to your **specific business needs.**
- Build **standalone** copilots **or extend** existing Microsoft 365 Copilot
- **Automating complex business tasks** such as onboarding employees, managing expenses, and handling customer service interactions
- High standards of **data security** and governance.

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

Build Copilot that **work across multiple channels:**

 Telephony	 Microsoft Teams	 Demo website	 Custom website
 Mobile app	 Facebook	 Skype	 Slack
 Telegram	 Twilio	 Line	 GroupMe
 Direct Line Speech	 Email

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

What makes copilot created from Copilot Studio, **more than just a 'Chatbot'**.

- **Prompt instruction**
- **Knowledges**
- **Actions**
- **Generative Answer**
- **Security**

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

Action: Want Copilot to handle specific tasks? Simply create an Action for it to use. With the support of over 1,000 Power Platform connectors, your **Action can achieve almost anything**. Seriously.

"DYNAMICS 365 FO & COPILOT" THE FUTURE OF WORK IN MANUFACTURING

Generative Answer: Experience human-like conversations with the power of the renowned GPT model. Unlike traditional chatbots, it understands context even when it doesn't match predefined keywords. Ever seen how smart ChatGPT is? This is almost the same but with your data.

The screenshot shows the configuration interface for a Copilot trigger. It features a 'Trigger' section with a 'Triggered by copilot (preview)' action. Below this, there is a description: 'Describe what the topic does' and a text box containing 'This action provides information about lead, use this when user ask about lead.' A plus sign indicates a connection to the 'Create generative answers' section. This section includes an 'Input' field with the value '{x} Activity.Text string' and a 'Data sources' section with an 'Edit' link.

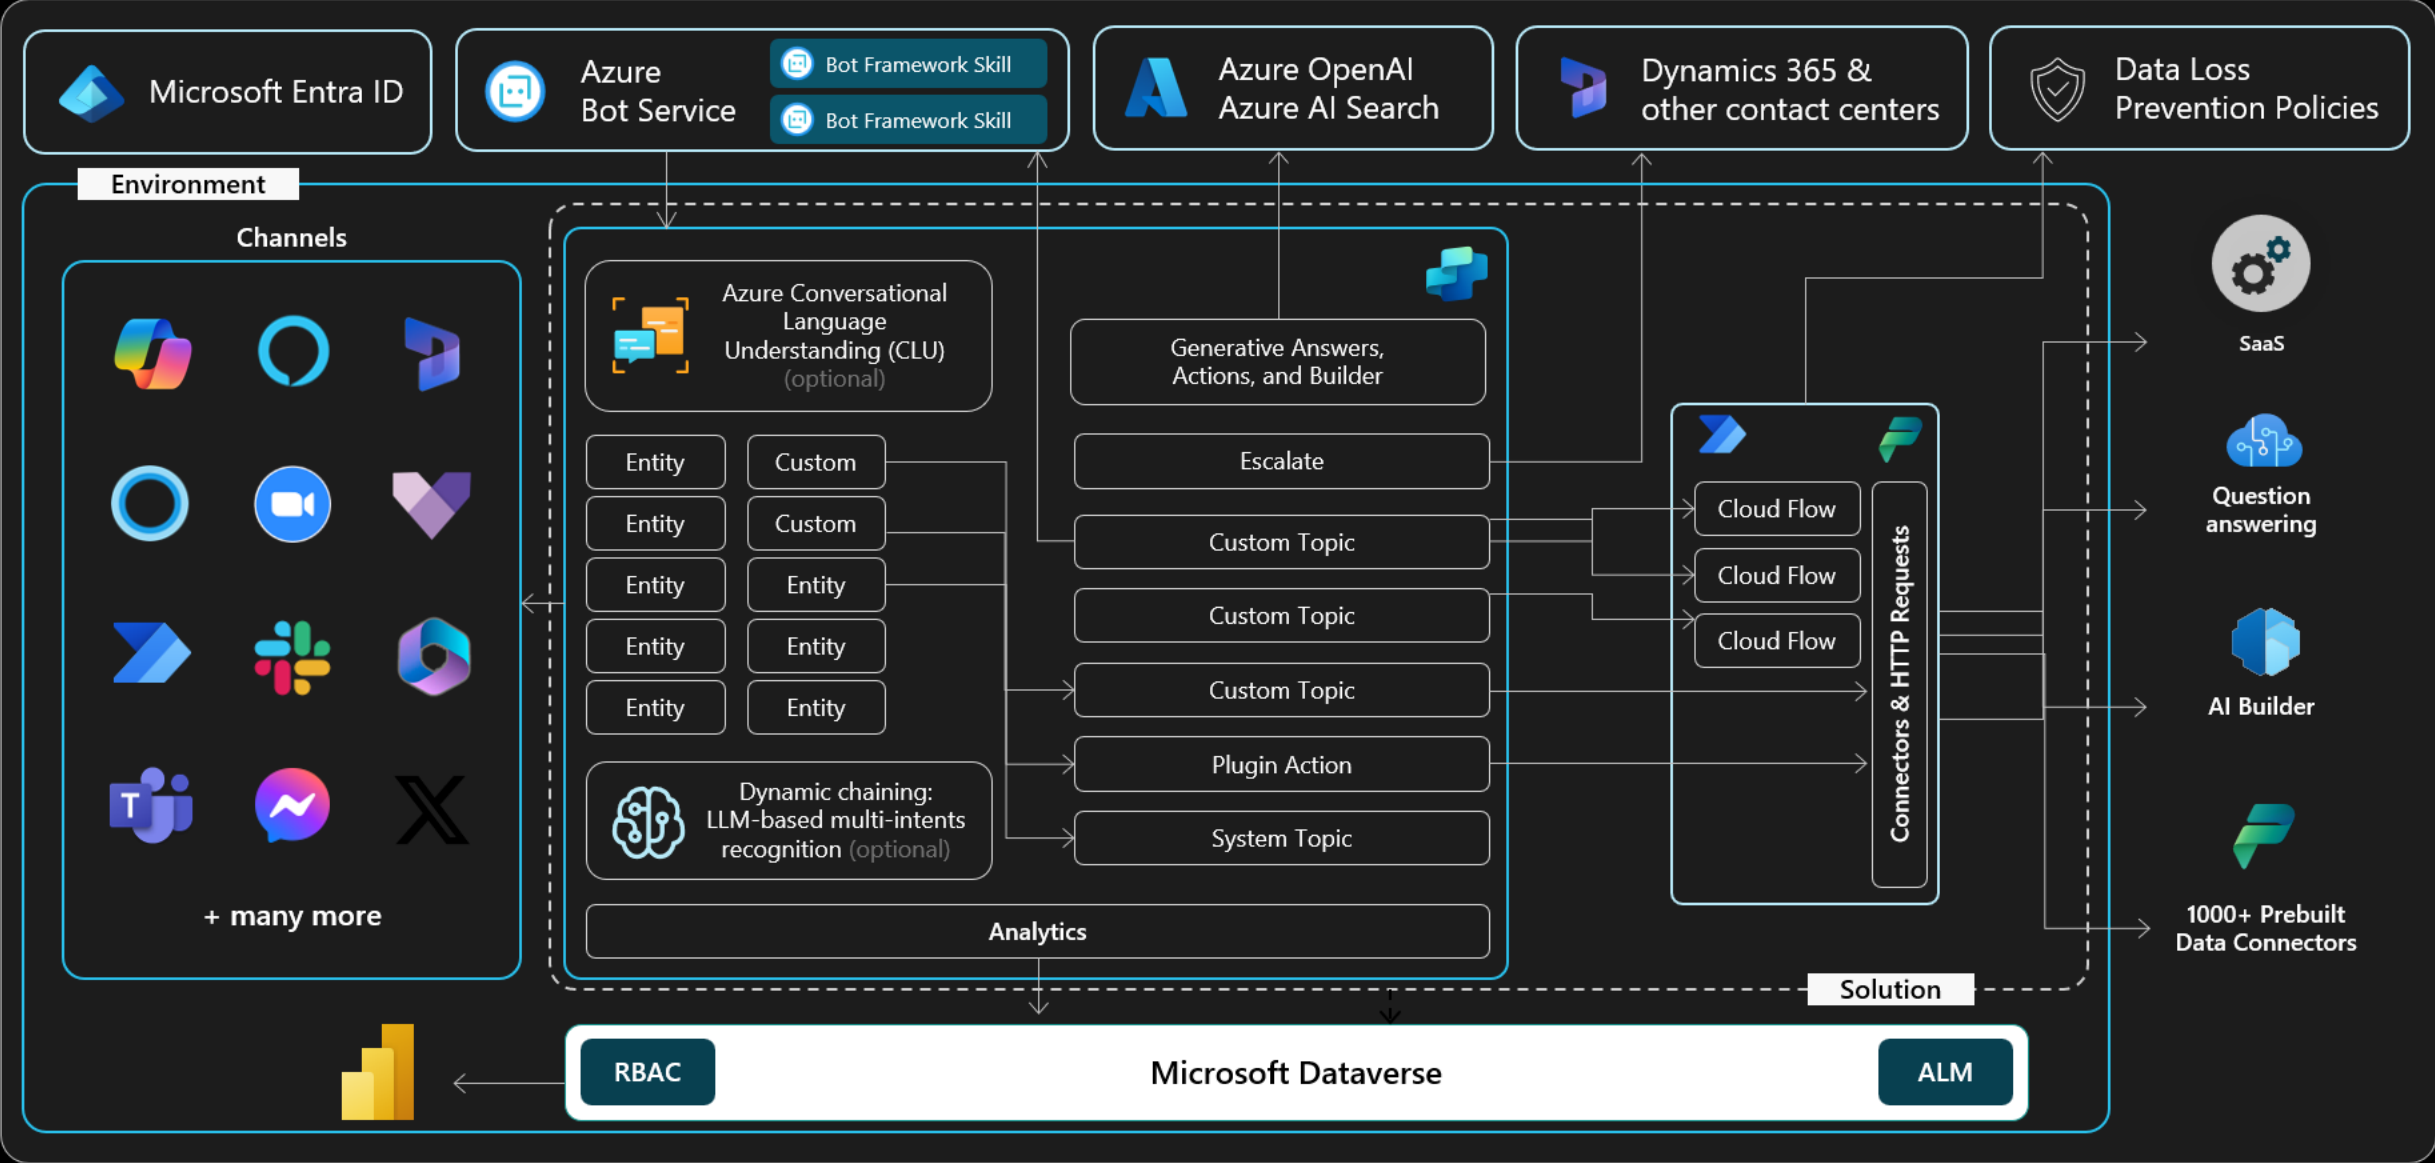

The screenshot displays a chat interface in Thai. The first message is 'จำนวน lead ทั้งหมดในระบบ' (Total number of leads in the system) with a timestamp of 'Just now'. The response is 'จำนวน lead ทั้งหมดในระบบคือ 13 รายการ' (Total number of leads in the system is 13 items) with a link to 'quickdev.crm5.dynamics.com'. The second message is 'มูลค่ารวมของ lead ทั้งหมด' (Total value of all leads) with a timestamp of 'Just now'. The response is 'มูลค่ารวมของ lead ทั้งหมดคือ 13,460,000 บาท' (Total value of all leads is 13,460,000 Baht) with a link to 'quickdev.crm5.dynamics.com'. Both responses include a '1 reference' and a link to the same URL.

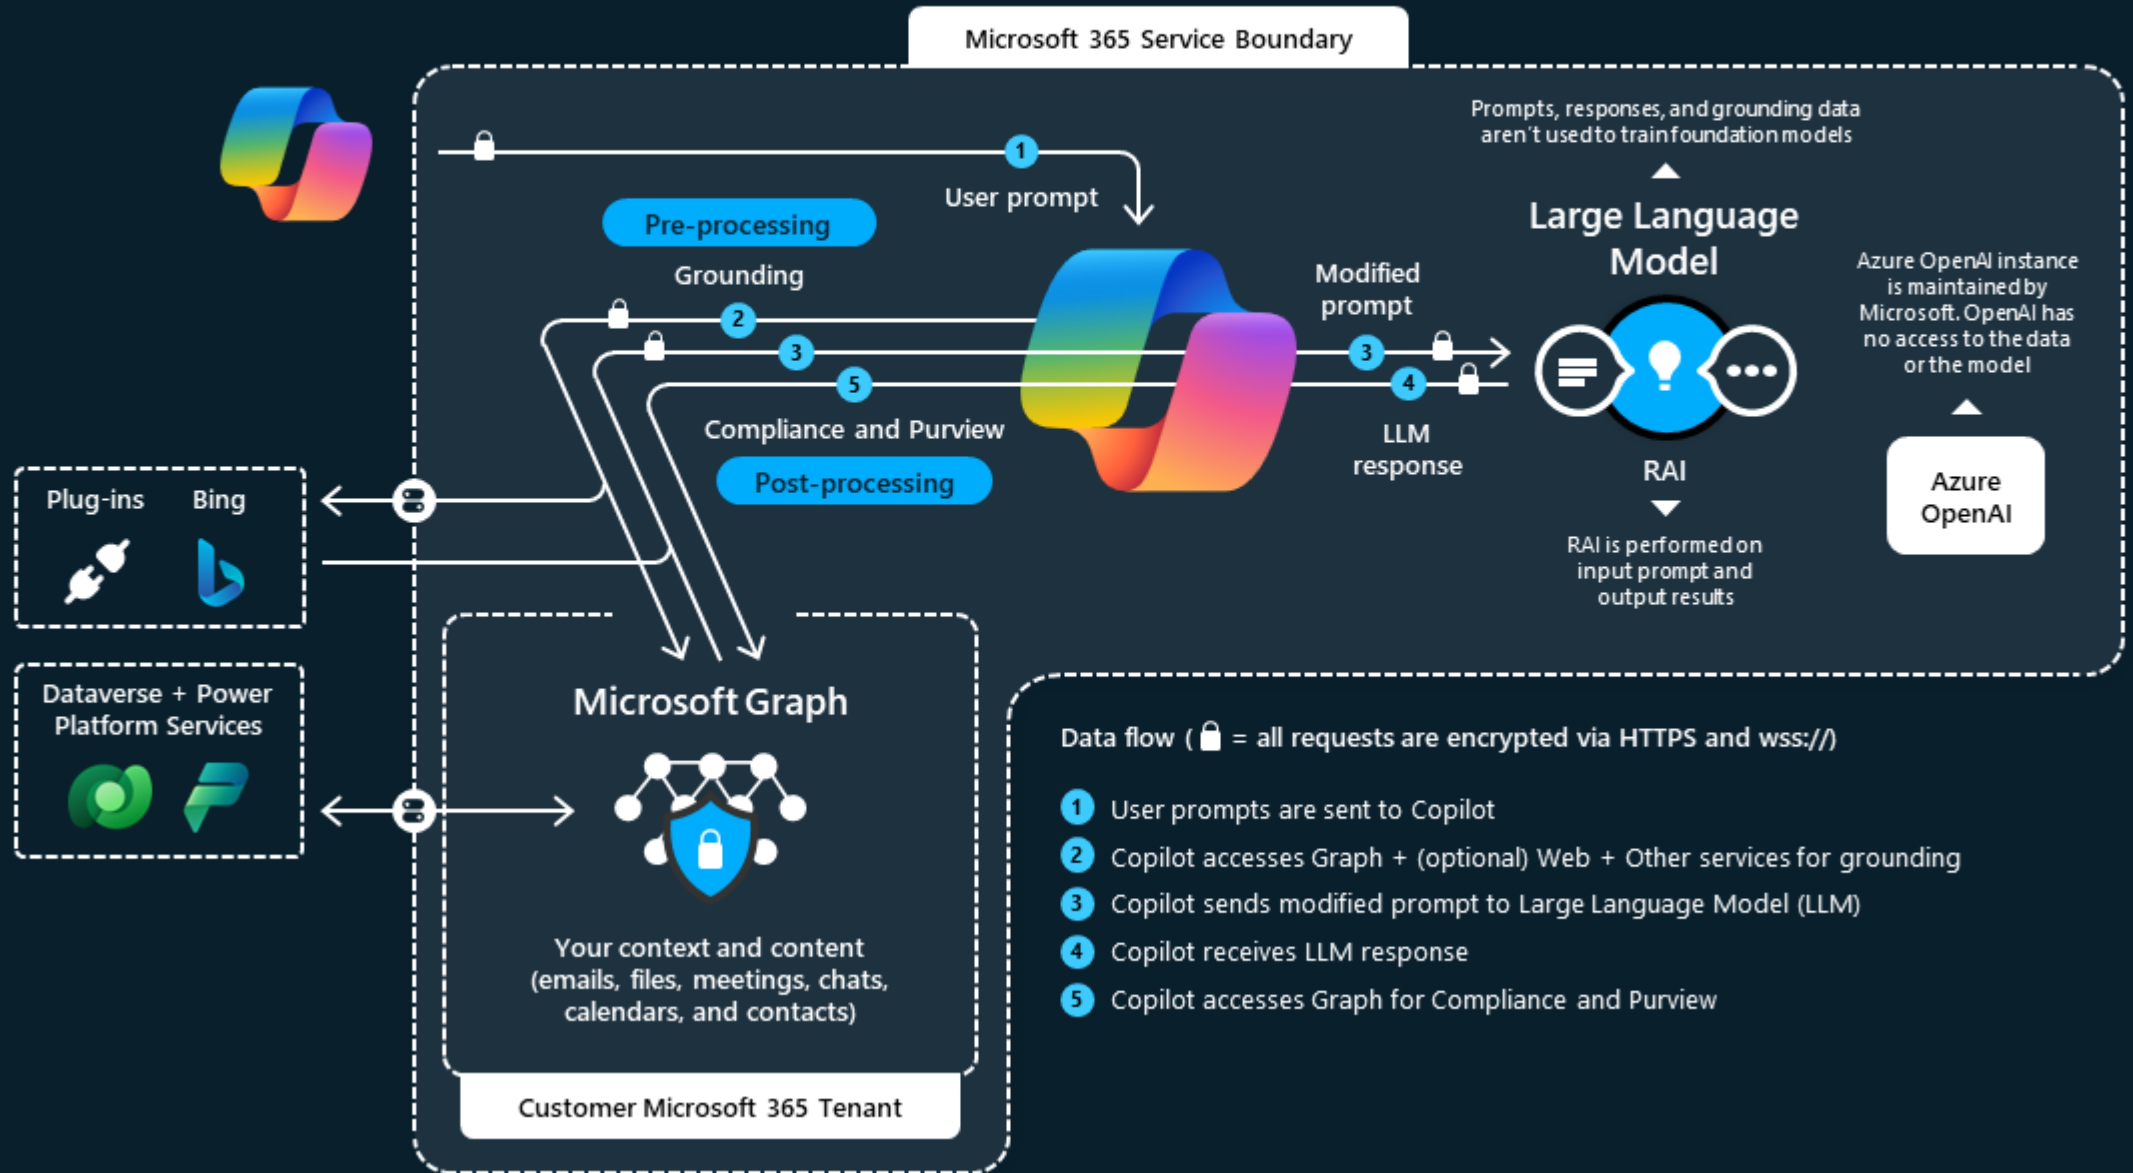

Copilot understand and can respond in Thai
